

Abimbola Charis O

Software Engineer

[LinkedIn](#) | [GitHub](#) | bimbowande@gmail.com | +44 (0) 7360 579131

PROFILE SUMMARY

Software Engineer with nearly a decade of experience designing and delivering scalable, **high-performance web applications** within **microfrontend and monolith** architectures. Specialising in **JavaScript, TypeScript, React**, Next.js, Angular, Vue.js, GraphQL, Go, PHP, and MySQL, with a strong focus on building resilient systems, optimising user experience, and maintaining clean, maintainable codebases. Experienced in implementing controlled **release strategies** using **Unleash**, managing **CI/CD pipelines via Jenkins**, and monitoring production systems with **Grafana and Grafana Loki**. Proven ability to collaborate cross-functionally, lead complex **feature delivery**, and drive improvements in performance, reliability, and **deployment processes**.

SKILLS

HTML / CSS

HTML5, Accessibility, CSS, SASS

JavaScript

JavaScript, TypeScript, ES6, RxJS

Testing & Automation

Cypress, Jest, Vitest, React Testing Library, Browser compatibility, Usability Testing, Lighthouse, SEO integration

Version Control

Git, GitHub, Gitflow

APIs

REST, GraphQL, Web API

Build tools/ Framework

Vite, Webpack, NPM, Yarn.

Observability/ Monitoring

Grafana, Grafana Loki.

Frameworks / Libraries

ReactJS, NextJS, Angular 13 & 14, Vue

Cloud & Infrastructure

AWS, Docker

Collaboration

GitLab, Trello, Slack, Jira, Confluence

Backend Development

GO, PHP, NestJS, Node.js, Python

AI/LM Tools

LangChain, TensorFlow, Llamaindex

UI Frameworks

Tailwind, Material UI, Bootstrap,

State Management

Redux, React Hooks, Apollo

Agile Methodologies

Scrum, Kanban

Databases

SQL, MongoDB, MySQL, PostgreSQL

Security

Auth0, JWT, Clerk, Okta,

EXPERIENCE

Senior Frontend Engineer | Betfred, UK | August 2025 - Present (Hybrid)

The Bonus King

- Led the development of **BonusCode v2**, key promotions features, and a **Content Management System (CMS)** within a **microfrontend architecture**, delivering scalable, independently deployable modules that improved release velocity, content management capabilities, and overall user experience
- Implemented feature flagging with **Unleash** and managed CMDB configurations to enable controlled rollouts and seamless player migration, significantly reducing deployment risk and improving release stability
- Collaborated cross-functionally with backend teams to diagnose and resolve complex system issues, using iterative testing and **strong debugging practices** to improve system reliability and reduce production defects
- Owned CI/CD pipelines and production observability, deploying via **Jenkins** and leveraging **Grafana** and **Grafana Loki** to improve monitoring visibility, speed up incident response, and increase release confidence

Project link: <https://www.betfred.com/>

Skills: **ReactJS, Redux, AWS, Typescript, GraphQL, Grafana, Feature Flagging, MicroFrontends**

Lead Frontend Engineer | FindChow, UK | March 2024 - August 2025

Order intercontinental meals & groceries online

- Developed and maintained a robust **component library** using **Storybook**, Tailwind CSS, SASS, and Vite, resulting in a unified design system and reducing UI development time across teams by 30%.
- Improved **code quality and streamlined deployment** processes by integrating Husky for pre-commit checks and **ESLint for linting**, which led to a noticeable drop in code-related issues during **CI/CD pipelines**.
- Led the **Order Management System** web application redesign, delivering a responsive, accessible, and reusable UI that enhanced user experience and reduced support tickets by 25%.
- Introduced **visual regression** testing with **Chromatic**, significantly increasing deployment confidence and minimizing UI discrepancies across environments.

Project link: <https://www.findchow.co.uk/>

Skills: NextJS, ReactJS, Redux, MongoDB, Storybook, AWS, Typescript, GraphQL, MaterialUI, AWS Amplify, PHP

Senior Software Engineer | Boohoo Group PLC , Manchester | August 2023 – March 2024

Leading online fashion group servicing fashion-conscious consumers

- Partnered closely with the **Solution Architect** to align project implementation with architectural principles and best practices, ensuring technical decisions supported scalability and long-term maintainability.
- Built and maintained **high-performance B2B eCommerce web applications** using **ReactJS and TypeScript**, improving UI responsiveness and reducing customer support queries through a more intuitive user experience.
- Integrated **RESTful APIs and GraphQL endpoints** in collaboration with backend developers and architects, resulting in seamless, **real-time data synchronization** and improved application reliability.
- Led a team of frontend engineers through the full software development lifecycle, while also implementing **secure authentication systems** using **Auth0, JWT, and Okta**, which strengthened user data protection and streamlined login experiences.

Skills: NextJS, ReactJS, Redux, MongoDB, Storybook, AWS, Typescript, GraphQL, MaterialUI, AWS Amplify, PHP

Senior Frontend Developer / UI Engineer | Pakt | June 2022 – June 2023

Building web3 components for Pakt and the blockchain community

- Built **interactive Web3 components** using **Storybook** and **Atomic Design methodology**, streamlining UI development and achieving a **25% reduction in time-to-market** for new features through improved consistency and scalability.
- Designed and implemented a **comprehensive UI testing strategy** using **React Testing Library and Vitest**, significantly enhancing component reliability and reducing post-deployment bugs.
- Utilized **Next.js App Router** to create scalable, high-performance routing structures and implemented **image optimization strategies**, leading to **faster page loads and a smoother visual experience** for users.
- Collaborated with senior engineers to perform **root cause analysis**, review complex codebases, and implement robust unit tests, ensuring consistent **code reliability and system functionality** across the platform.
- Enhanced **web platform performance** by optimizing image delivery and reducing HTTP requests, contributing to lower bounce rates and faster load times

Project link: <https://pakt.world/>

Skills: AWS, NodeJS, NestJS, NextJS(App router), ReactJS, Redux, Storybook, Typescript, HTML5, Jira, confluence, PHP & MySQL, Tailwind

Senior Front-End Developer | GIGX Technologies | April 2021 - May 2022 (Remote)

The secure and simple way to send and receive money across borders.

- Developed **functional and appealing web and mobile interfaces** using **TypeScript, ReactJS, Redux, and CSS**, significantly improving usability and increasing customer retention and user engagement.
- Facilitated **code reviews and pair programming**, fostering a culture of clean, maintainable code and elevating overall code quality within the development team.
- Collaborated with backend developers to integrate **smart contract-powered APIs** for blockchain interactions, enhancing secure and decentralized transaction workflows.

Played a key role in designing and implementing **highly scalable, fault-tolerant DeFi applications**, ensuring high availability and real-time processing for end users.

- Improved **data analytics and visualization dashboards** for stakeholders, enabling effective measurement of company progress, growth, and turnover.

Project link: <https://gigxpad.com/>

Skills: **NestJs, NodeJs, PHP & MySQL, ReactJs, Redux, MongoDB, GraphQL, NextJs, SEO, Agile (Kanban & Scrum), AWS, and CI/CD**

Frontend Developer | GIG LOGISTICS | February 2019 - May 2021

Leading Logistics and transport company in Nigeria

- Provided design and engineering expertise to develop scalable **logistics web applications** serving over 50,000 users across **Nigeria, Ghana, and the USA**, translating complex business requirements into reliable solutions.
- Led the development of a **critical module for onboarding dispatch riders and managing hub-to-hub waybill operations across 98 service centers**, significantly improving operational efficiency and service reliability.
- Improved site performance by implementing advanced **page caching strategies**, resulting in a 32% increase in user traffic and faster load times.
- Implemented **analytics and tracking tools to monitor user behavior and application performance**, delivering actionable business insights that informed product and user experience improvements.
- Championed Agile methodologies through collaborating cross-functionally to conduct **root cause analysis, perform code reviews and unit testing**, and maintain comprehensive documentation, ensuring high-quality software delivery aligned with business goals.

Project link: <https://giglogistics.com/>

Skills: **Angular10, JQuery, C#, NextJs, React, SEO, Agile (Kanban & Scrum), Azure,**

Full Stack Developer | PLANET NEST | April 2016 – June 2018

- Estimated development efforts for client project requests by analyzing provided documentation, ensuring accurate project planning, and timely delivery.
- Mentored over 20 Junior programmers and volunteered as a coding tutor for 3,000 children, fostering technical skills and inspiring the next generation of developers.
- Facilitated a bootcamp attended by 100+ undergraduates, promoting security and quality assurance best practices throughout the software development lifecycle.
- Enhanced existing software by identifying and correcting errors and optimizing performance, contributing to improved system efficiency and reliability.

Project link: <https://seeddev.group/>

Skills: **PHP, MySQL, JavaScript, Angular 10, JQuery, C#, NextJS, SEO, Agile, Azure, CI/CD**

EDUCATION

Master of Science, Big Data Analytics | University of Derby - United Kingdom

Jan 2022 - Jan 2023

Bachelor of Technology (Hons), Computer Science | Federal University of Technology - Nigeria

Nov 2012 - August 2018

OTHER PROJECTS

- Designed, built, and deployed **GIGL GO**, a customer portal that enables eCommerce and enterprise users to efficiently manage and track their shipments in real time with Angular, CSS, and RxJS.
- Designed and developed **weather wizard**, a responsive weather application that provides real-time hourly forecasts across multiple countries, offering users accurate and location-based weather updates with an intuitive and user-friendly interface.
- Designed and developed **Todo App**, a task management application that helps users organize daily tasks and routines efficiently, with features for creating, updating, and tracking to-do items through a clean and intuitive user interface.

CERTIFICATION

- Artificial Intelligence Micro-certification (AIC)

SOFT SKILLS

- Strong **communication** and networking skills.
- **Prioritization & Efficiency**: Proven ability to manage multiple competing priorities, staying productive under tight deadlines in high-pressure, **fast-paced** environments.
- **Team Engagement & Leadership**: Proactive in engaging the right stakeholders to solve problems, drive collaboration, and inspire action.
- Passion for **Innovation & Sustainability**: Keen interest in driving sustainable innovation through technology.
